TO WHOM IT MAY CONCERN:

BDA Global consultants Ronald French and Gaston Boisson assisted Security Service Federal Credit Union (SSFCU) with its efforts to perform a comprehensive business impact analysis and develop actionable Business Continuity Plans (BCP) using the PLANET BCP software. Activities included developing SSFCU's emergency evacuation plan, identifying business units, determining critical processes and required resources, and developing Corporate and unit-level BCPs.

Security Service Federal Credit Union (SSFCU) has been extremely pleased with the business continuity (BC) related consulting services provided by BDA Global's consultants. These consultants helped to ensure that our business continuity plan effectively positions SSFCU to respond to any emergency, and established sound procedures for the rapid recovery of our most critical business operations and resources in the event of any contingency. This professional consultation has enabled the SSFCU business continuity plan to be in compliance with the most recent FFIEC guidelines.

We recommend BDA Global consultants, Ron French and Gaston Boisson, to other organizations as well.

Sincerely,

  
CARLO F. IENNA

Senior Vice President, Asset Management
